Experience

Product Design Intern / MongoDB

May 2018 - August 2018, New York City

I led redesigns of the login & sign-up experience and the course overview user interface for one million users on MongoDB University. I collaborated with product managers, engineers, and designers to conduct user research, design critiques, and user testing sessions.

UX Designer / Charles Schwab

January 2017 - August 2017, Austin

I designed and developed front-end prototypes featuring cutting-edge financial technology, such as natural language processing and sentiment analysis, for Charles Schwab R&D. I presented these prototypes to executive managers on a regular basis.

UX Design Intern / Charles Schwab

May 2016 - August 2016, Austin

I collaborated with engineers to design an enhanced stock market chart that shows sentiment analysis, historical financial events, and social media news for any publicly traded stock.

UX Teaching Assistant / Georgia Tech

August 2017 - Present, Atlanta

I teach the fundamentals of user-centered product design to 70 students each semester. I advise students as they complete semester-long design projects for solving real-world problems.

Education

Georgia Tech

2012 - 2016, 2017 - Present, Atlanta

M.S. Human-Computer Interaction
B.S. Computer Science

I contributed to projects involving virtual reality, artificial intelligence, multi-sensory interfaces, ubiquitous computing, and data visualization.

Skills

Design: Sketch, Adobe Creative Suite, Interaction Flow, Wireframe, Mockup, Design System, Data Visualization

Prototyping: Invision, Proto.io, HTML, CSS, Javascript, Physical Model

Research: Interview, Observation, Survey, Competitive Analysis, Affinity Mapping, Persona, Task Analysis

Testing Think Aloud, Cognitive Walkthrough, AB Testing, Heuristic Evaluation, Design Critique

Coding: Front-End Development, Data Structures, Algorithms, Agile
